

Forest Recreation

The Channels State Forest is open from dawn to dusk and offers opportunities for hiking, wildlife watching, biking, horseback riding, hunting and picnicking. Hunters must have a State Forest Use Permit as well as all other required licenses. Horseback riding is restricted to existing roads and trails. NO horses are allowed on the Channels Summit Spur Trail as this trail is foot-travel only.

At the top of the mountain, hikers can enjoy long-range mountain views in all directions and explore the Great Channels. The fire tower located on the top of the mountain is now retired and out of service but is an important part of the history of the area.

Visitors are asked to adopt a "leave no trace" ethic when visiting the forest, as there are no restrooms or trash receptacles on the forest.

A State Forest Use Permit is required for hunting, trapping, fishing, bike riding and horse riding on Virginia State Forests. Permits are required for individuals age 16 and older, and can be purchased online for \$15.00 at <http://secure01.virginiainteractive.org/horff/> or where hunting licenses are sold.

Channels State Forest Features:

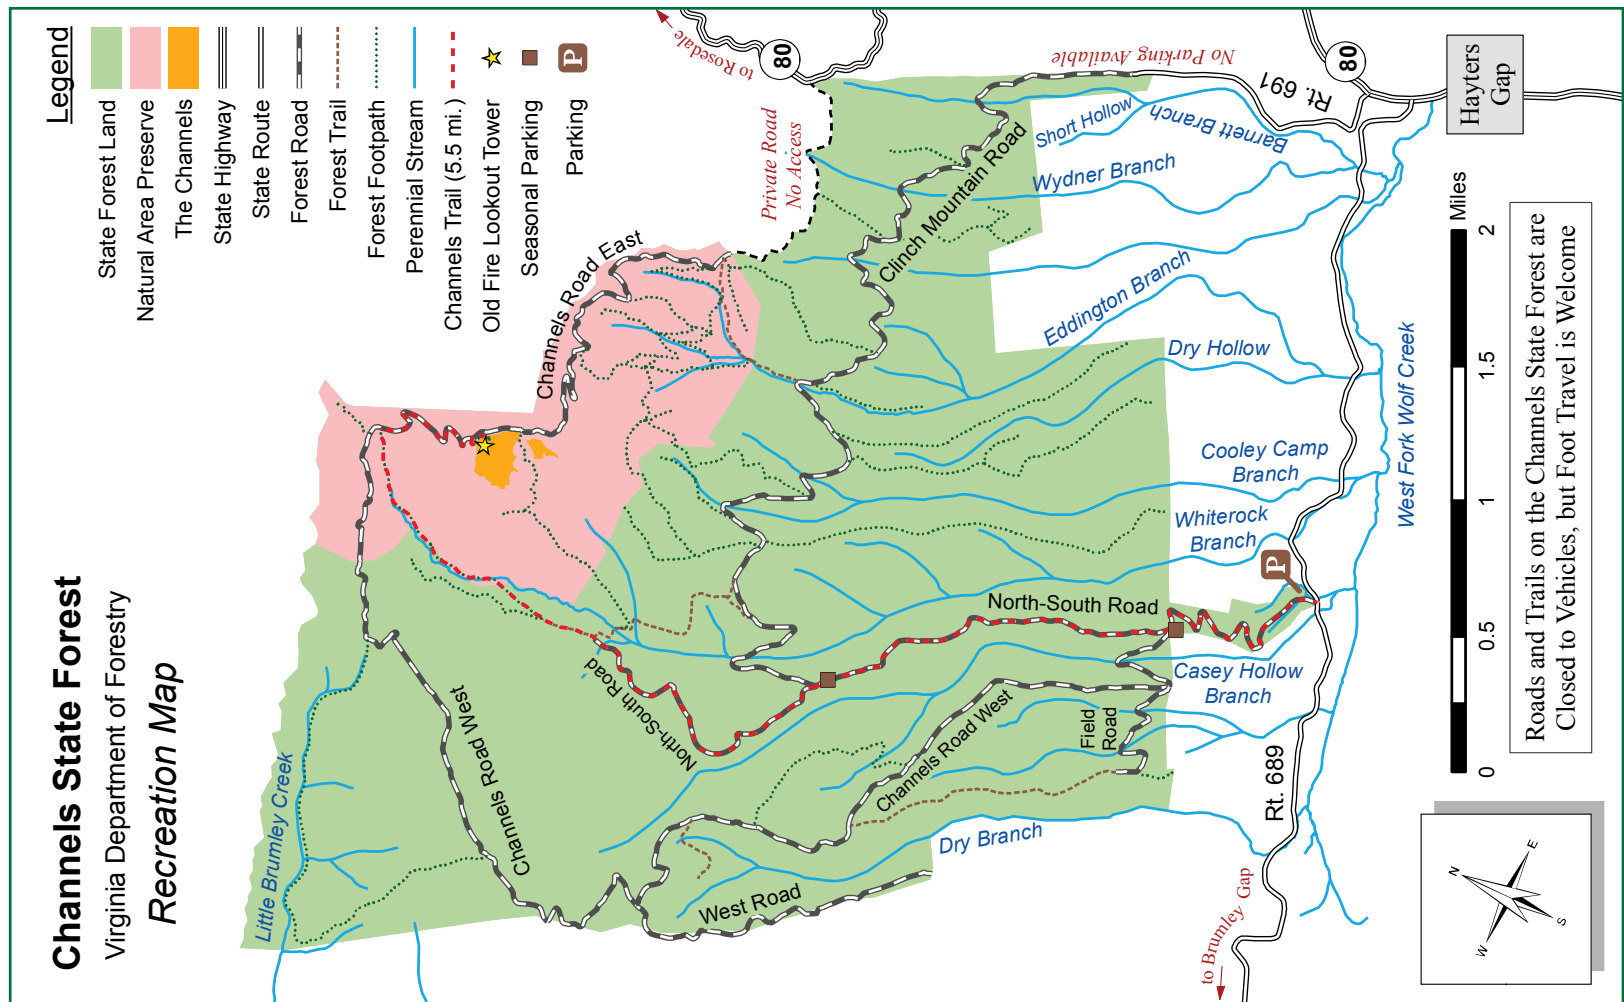

Trails: 0 miles
 Vehicle Roads: 0 miles
 Gated Vehicle Trails: 38.8 miles
 Ponds/Lakes: 0
 Hunting: Yes
 Picnic Shelter: 0
 Restrooms: No
 Fishing: No

State Forest Regulations

- Hunting and trapping with State Forest Use Permit in accordance with state hunting regulations.
- Biking and horse riding in designated areas only with State Forest Use Permit.
- State Forest Use Permits required only for anyone age 16 and older.
- No removal of any tree, plant or mineral.
- Remove all trash.
- No camping, ATVs or public display of alcohol.
- No fireworks, campfires or open air fires of any type.
- Firearms are prohibited except for hunting purposes.
- Vehicular traffic on established roads only; not permitted on gated roads.

Channels State Forest

Channels State Forest

Forest History

The Virginia Department of Forestry purchased what is now the Channels State Forest from The Nature Conservancy (TNC) in early 2008. TNC had purchased the property a few years earlier for the purpose of protecting and conserving this unique and valuable resource. Within the boundary of the 4,836-acre property is a 720-acre parcel that is on lease to the Virginia Department of Conservation and Recreation as part of its Natural Heritage Area Program. At the crest of the mountain, within the Natural Area Preserve, are the Great Channels of Virginia. This impressive formation is a 400-million-year-old sandstone outcropping where water has eroded deep crevices or "channels" in between massive boulders.

Located on the southern slope of Clinch Mountain, elevations on the Channels State Forest range from 1,800 feet to more than 4,200 feet. Ecological communities and forest types change significantly with elevation. A diversity of forest types from cove hardwoods to northern hardwoods are present. Carolina saxifrage, a rare plant listed by the Virginia Department of Conservation and Recreation as imperiled, can be found along moist rock outcroppings in the forest's higher elevations.

Forest Management

Like all of Virginia's state forests, the Channels is managed for multiple uses. One management goal is sustainable timber production. Management activities on the Channels State Forest demonstrate sound forestry and conservation practices. Wildlife habitat, recreation and watershed protection are all compatible with sound timber management strategies.

In the past, through several ownerships, the forest was subject to unregulated logging resulting in the diminished quality and productivity of the land. The Channels State Forest will be managed to continually restore and improve the forest, encourage natural biodiversity, protect water quality, provide wildlife habitat and provide recreational opportunities.

About Your State Forests

The Virginia Department of Forestry (VDOF) manages 19 State Forests and other state lands, totaling 57,685 acres. Virginia's State Forests are managed for multiple uses: water quality, recreation, forest products, wildlife and scenic beauty. The primary management goals of individual State Forests may vary, usually depending on the wishes of the donor of the land.

The State Forests of Virginia are self-supporting and receive no taxpayer funds for operation. Operating funds are generated from the sale of forest products. In addition, up to 25 percent of the revenue received from the sale of forest products is returned to the counties in which the forests are located. You can support educational programs on your State Forests by donating a portion of your state tax refund to Virginia's State Forests Fund.

LOCATION
